AWARD WINNING SERIES

The award winning AMBIANCE CLX2 Series is the newest next generation and most innovative modern electric fireplace on the market today.

With an unsurpassed realistic flame pattern, these models are packed with features including recessed or wall mount installations, LED flame technology, high-tech touch screen controls, variable heat with thermostat, customizable media, and a remote control. With just the touch of a button, the mood can be changed by setting the flame colour to blue.

The five sizes available, make it convenient to add this beautiful and functional electric fireplace into any room or setting.

AL1150CLX2-AU

AL1500CLX2-AU

AL2000CLX2-AU

AL1150CLX2-AU AL1500CLX2-AU

The popular AMBIANCE CLX electric fireplace offers the ultimate combination of versatility and design. It can be mounted directly onto the wall or easily recessed into any 2" x 4" wall for a flawless custom finished look.

The AL1150 and AL1500 sizes are the perfect addition to any bedroom, office, and more.

AL2000CLX2-AU AL2500CLX2-AU

These two impressive lengths are designed for larger spaces to give a WOW factor to any project. Easily switch from Coals or Glacier Crystal Glass medias for a completely customizable fireplace feature. Adding such a dramatic look into the room has never been easier with this wall mounted or 2" x 4" recessed design while retaining heating capability up to 42m².

AL3600CLX-AU

This massive 3.6m model is the largest electric fireplace on the market today. Due to popular demand, this custom fireplace is now available for the ultimate electric fireplace experience. Creating a perfect addition for commercial spaces such as a Hotel Lobby or Restaurant.

AL2500CLX2-AU

AL3600CLX-AU

REMOTE CONTROL

The On/Off button toggles the unit on or off. The Color button toggles the flame from orange to blue. The Dimmer button will lower the brightness of the flame, while the Bright button will make the fire image brighter.

Press the Heat down arrow to set the heat to low, press the Heat up arrow to set the heat to high. Press either of these buttons twice to turn the heat off.

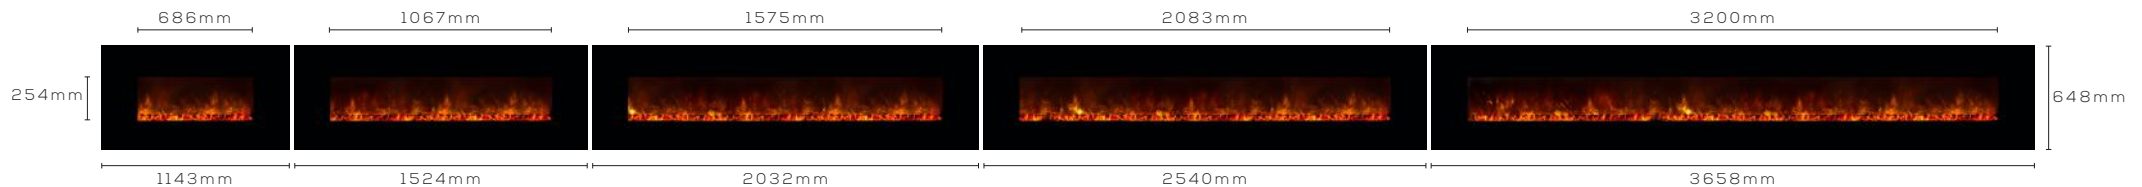

TOUCH SCREEN TECHNOLOGY

Directly below the flame on the right hand side you will find a series of touch controls. The 3 stacked icons (in order) operate the power, heat (on/off) and light intensity.

Hold the light intensity for 5 seconds to change the back screen color from orange to blue. To the right of the stacked icons you will see a digital readout with arrows on the top and the bottom. The digital readout indicates the temperature the thermostat is set to. Touch the arrows above or below the digital readout to increase or decrease the set temperature. All touch controls fade to black after 4 seconds.

FIRST OF ITS KIND

The LANDSCAPE FULLVIEW built-in electric fireplace is the first of its kind creating a perfect substitute for a linear gas fireplace.

A unique frameless design allows for edge to edge flame presentation as well as unlimited surround capabilities.

Available in five different lengths for any application as well as two customizable flame bed options for different fit and finishes.

A 2-stage heater is also included for supplemental heat up to 45m².

LFV2-1000/400-AU

LFV2-1500/400-AU

LFV2-2000/400-AU

LFV2-1000/400-AU

LFV2-1500/400-AU

The LANDSCAPE FULLVIEW electric fireplace is changing the way the industry views built-in electrics. With five different convenient sizes, there is sure to be a size that fits your residential and commercial needs.

The uninterrupted landscape view of the fireplace can also be upgraded from Coal Embers to a hand-painted Driftwood Logset.

LFV2-2000/400-AU

LFV2-2500/400-AU

The LANDSCAPE FULLVIEW fireplace directly wires in to a standard 220/240Volt 10Amp electrical circuit, requires no additional venting, and costs a fraction to operate compared to gas fireplaces.

Despite the simplicity when it comes to installing, the fireplace retains heating capabilities of 45m².

LFV2-3000/400-AU

At just over 3 meters, the LANDSCAPE FULLVIEW is the largest built-in electric of its kind. Modern Flames already produces the largest linear electric and now we have the largest linear built-in. This unit operates on the same electrical power as the others and still requires no additional venting. Easily installs into any framed wall and allows for any type of wall covering.

REMOTE CONTROL

The On/Off button toggles the unit on or off. The Color button toggles the flame from orange to blue. The Dimmer button will lower the brightness of the flame, while the Bright button will make the fire image brighter.

Press the Heat down arrow to set the heat to low, press the Heat up arrow to set the heat to high. Press either of these buttons twice to turn the heat off.

TOUCH SCREEN TECHNOLOGY

A tethered wall control unit is included with the Landscape models. When all indicator lights are off, touching any button will only show the status.

Once the indicator lights are on, you can begin operation. Touch the Power button to turn the machine on. This will be indicated by one orange LED light. Touch the Power button again to turn off the machine.

The heat button can be pressed multiple times and will turn on Low, High and Off, in that order.

The Dimmer/Color button turns on High, Medium, Low and Off, in that order. Long-press the Dimmer/Color button to toggle the flame color from orange to blue.

INTERCHANGEABLE FLAME COLORS (12 OPTIONS)

GLACIER DIAMOND CRYSTALS

CHOOSE YOUR FLAME

The SPECTRUM SERIES built-in electric fireplace brings the flame versatility and size options to the conventional electric fireplace. Our award winning flame appearance now features 12 different flame color combinations to choose from.

A gray back screen allows the colors to shimmer and shine, dancing off multicolor glacier diamond glass, creating a crisp, clean flame and contemporary look.

The Spectrum Series is available in 2 different box size models: 50" and 74" linear. A thermostat, touch control and remote completes this innovative series.

SL50-INT

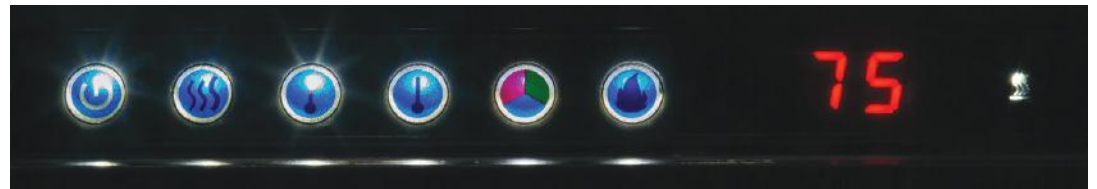

REMOTE CONTROL

The On/Off button toggles the unit on or off. The Color button toggles the flame from orange to blue. The Dimmer button will lower the brightness of the flame, while the Bright button will make the fire image brighter.

Press the Heat down button to set the heat to low, press the Heat up button to set the heat to high. Press either of these buttons twice to turn the heat off.

COLOR COMBINATIONS AT THE PUSH OF A BUTTON

The 6 button control panel is located at the top right of fireplace including the digital readout thermostat. Button (1) turns the fireplace on or off. Button (2) turns on the heater. Button (3) turns the heater temperature up and (4) turns the heat down. Button (5) cycles through the 12 different flame color combinations, and button (6) adjusts the flame intensity.
